DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "55" has been used to designate both a <u>sealing o-ring</u> and as the <u>opposite side face</u> of base part "50". Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

2. Claims 42-107 allowed. The following is a statement of reasons for the indication of allowable subject matter:

The prior fails to disclose or render obvious a device to deliver a free-flowing medium. The device contains a drive housing, defining a delivery direction of the free-flowing medium. The device also contains a magnet coil disposed within the drive housing, the coil being constructed to generate a magnetic flux in an energized state. The single most inventive element of the device, disposed within the magnet coil, is the axially movable actuator device comprising two armature elements, the armature

Art Unit: 3752

elements being disposed a predetermined distance from one another in the delivery direction. The two armature elements are affixed to a singular armature carrier element (plunger). Further, the armature elements define an axially movable armature assembly within a novel armature cylinder. Disposed within the magnet coil, adjacent to the armature elements, the armature cylinder comprises two spaced elements constructed to interrupt magnetic flux.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James S Hogan whose telephone number is (571) 272-4902. The examiner can normally be reached on Mon-Fri, 7:00a-4:00p EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Scherbel can be reached on (571) 272-4919. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
